PRIMARY EXAMINER

Continuation of 3. NOTE: The proposed amendment to the specification raises a new matter issue. The proposed amendment to page 5, lines 1-14, incorporates by reference US Patent 5,445,662, an incorporation by reference not found in the originally filed specification.

Continuation of 11. does NOT place the application in condition for allowance because: the request for reconsideration in regards to the objection to the drawings has been fully considered but is found unpersuasive. Figure 6 of the filed drawings includes elements "92","90", and "102" denoting the same structural element, but the specification notes as referring to bearings and drive members Enclosed is figure 6 highlighting elements 90,92, and 102 pointing to the same structural element.

Additionally, the amendment does not use the proper status identifiers for claim 6. Claim 6 currently has a "previously amended" status identifier, but there is no amendment to claim 6 on record that would invoke the use of such identifier.

Conclusion

The amendment to the specification will not be entered since it raises issues of new matter, the amendment to claim 3 will be entered since it reduces and simplifies issues for appeal, and the objection to the drawins is maintained.
